

# **10MWh Mobile Energy Storage Container for North American Tourist Attractions**

## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

How many megawatts of battery storage will be installed this year?

According to Bloomberg New Energy Finance, 750 megawatts of battery storage is forecast to be installed globally this year, up from 160 megawatts in 2014. Kuran, who previously headed storage businesses at NRG and SunEdison, said the key to his strategy is making batteries easier to move.
