## Overview

---

What is a 600 watt power inverter used for?

A 600 watt power inverter, such as the PowerBright 600 Watt Pure Sine Wave Power Inverter, is ideal for powering most small appliances. It converts 12V DC to 120V AC and comes with two 120V AC outlets. This inverter is perfect for camping, emergency situations, hurricane, and storm outages.

What is a 12V power inverter?

Power inverters with more than 90% conversion efficiency and stable performance. The 12V power inverter has the functions of current protection, short circuit protection, over-voltage protection, reverse charging protection, power protection, and core protection.

What is a 12V 220V power inverter?

This inverter 12V 220V generates 1000-watt continuous and 2000-watt surge power which can be applicable for AC household appliances or electrical devices during work trips, road trips, camping, and so on. This power inverter has full safety protections, built-in fuses, and a temperature-controlled cooling fan, to protect your devices from damage.

What is a 6V to 12V converter (inverter)?

The PGPI is a 6V to 12V converter for vehicles that still have a 6V, positive ground electrical system. It is necessary if you are still running positive ground for all of our radios, which run on a 12V, negative ground electrical system. The PGPI positive ground inverter comes with detailed wiring instructions.
