

150-foot folding container for fire station

Overview

What is a shipping container fire training facility?

This innovative fire training facility was constructed entirely from shipping containers. The modular design features interconnected containers for diverse training scenarios, including live-fire exercises and search-and-rescue simulations.

Are shipping containers good for firefighter training?

Shipping containers for firefighter training offer a solution by equipping fire departments with affordable, durable training facilities. They help firefighters develop critical firefighter skills like search and rescue, hose handling, and flashover awareness.

Can steel shipping containers be used in fire and rescue training?

The use of steel shipping containers in fire and rescue training is growing rapidly and for good reason. Their toughness, versatility, and easy and economical customization make these structures ideal for use in simulating conditions critical to emergency training, including fire growth, rollover, flashover and back draft phenomena.

What types of fire training technologies can a container structure accommodate?

Our container structures can be designed to accommodate any and all of our proprietary fire training technologies (digital, gas fueled and carbonaceous). Enhance your training by including tactical elements such as forcible doors, cold cut panels and backdraft indicators in your design.
