

20-foot mobile energy storage container for Kosovo's aquaculture industry

Overview

The energy storage battery system adopts 1500V non-walk-in container design, and the box integrates energy storage battery clusters, DC convergence cabinets, AC power distribution cabinets, temperature control system, automatic fire-fighting system, lighting system and so on. The total capacity is 3.096 MWh (9 clusters), and the clusters are connected to the DC side of the energy storage converter through the convergence cabinet in parallel. The battery system adopts 20-foot container installation, with high degree of system integration and strong environmental adaptability, which reduces the workload of on-site installation and debugging as well as later maintenance. What is a 20ft container energy storage system?

It also includes automatic fire detection and alarm systems, ensuring safe and efficient energy management. The 20FT Container 250kW 860kWh Battery Energy Storage System is a highly integrated and powerful solution for efficient energy storage and management.

What is a 20ft container?

A 20ft container is a critical enclosure for the energy storage system. It has a metal shell and grounding system to protect the system and users' safety. The battery cluster is composed of LiFePO₄ batteries arranged in a 1P20S configuration and a BMU. The 1MWh system includes 5 clusters, connected to a 500kVA PCS for output at 340-440VAC.

What is a 20ft container 250kW 860kwh battery energy storage system?

Equipped with automatic fire detection and alarm systems, the 20FT Container 250kW 860kWh Battery Energy Storage System is the ultimate choice for secure, scalable, and efficient energy storage applications. Email us with any questions or inquiries or use our contact data.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy

storage projects.
