

20MWh Mobile Energy Storage Container for Bridge Construction in Western Europe

Overview

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

How many mw can a battery energy storage system handle?

the load when needed, reducing the use of diesel generators. The battery energy storage system can also be used continuously to .6 MWh1.1 MW / 1.2 MWhBattery warran ISO container. 2590 mm and other high humidity/corrosive applicationsFire alarmIncluded as stand
