

40-foot mobile energy storage container used on Ecuadorian farms

Overview

What is a containerized battery energy storage system?

Let's dive in! What are containerized BESS?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

How many MWh can a container hold?

Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 - 2.9 MWh per container to meet all levels of energy storage demands. Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest cost-of-ownership.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);
