

5G base station virtual power plant

Overview

What is a 5G virtual power plant?

This model encompasses numerous energy-consuming 5G base stations (gNBs) and their backup energy storage systems (BESSs) in a virtual power plant to provide power support and obtain economic incentives, and develop virtual power plant management functions within the 5G core network to minimize control costs.

What is a 5G communication base station?

The 5G communication base station can be regarded as a power consumption system that integrates communication, power, and temperature coupling, which is composed of three major pieces of equipment: the communication system, energy storage system, and temperature control system.

Are 5G base stations energy-saving?

Given the significant increase in electricity consumption in 5G networks, which contradicts the concept of communication operators building green communication networks, the current research focus on 5G base stations is mainly on energy-saving measures and their integration with optimized power grid operation.

Does a 5G communication base station control peak energy storage?

This paper considers the peak control of base station energy storage under multi-region conditions, with the 5G communication base station serving as the research object. Future work will extend the analysis to consider the uncertainty of different types of renewable energy sources' output.

5G base station virtual power plant

Multi-objective interval planning for 5G base station ...

Dec 26, 2024 · As an emerging load, 5G base stations belong to typical distributed resources [7]. The in-depth development of flexibility resources for 5G base stations, including their internal ...

The Integration of 5G Base Stations and Virtual Power Plants

Sep 23, 2025 · Although 5G base station virtual power plants still face challenges in energy storage capacity, market mechanisms, and cost recovery, the direction is clear: as ...

Hybrid Control Strategy for 5G Base Station ...

Sep 2, 2024 · This model encompasses numerous energy-consuming 5G base stations (gNBs) and their backup energy storage systems (BESSs) ...

Efficient virtual power plant management strategy and ...

Mar 15, 2024 · Abstract Amidst high penetration of renewable energy, virtual power plant (VPP) technology emerges as a viable solution to bolster power system controllability. This paper ...

Interval-Based Multi-Objective optimization for communication Base

This article introduces a multi-objective interval-based collaborative planning approach for virtual power plants and distribution networks. After thoroughly analyzing the operational dynamics ...

Virtual Power Plant Energy Storage Device State

Jan 28, 2024 · In recent years, the integration of new energy devices into the power system to replace traditional sources has become a trend. Virtual power plants can effectively combine ...

Multi-objective interval planning for 5G base station virtual power

Jul 23, 2024 · Large-scale deployment of 5G base stations has brought severe challenges to the economic operation of the distribution network, furthermore, as a new type of adjustable load, ...

Research on decentralized resource operation optimization of virtual

Apr 22, 2024 · Abstract The extensive construction and promotion of 5G base stations (5GBSs) have led to a surge in communication energy consumption, as 5G energy consumption is ...

Hybrid Control Strategy for 5G Base Station Virtual Battery ...

Sep 2, 2024 · This model encompasses numerous energy-consuming 5G base stations (gNBs) and their backup energy storage systems (BESSs) in a virtual power plant to provide power ...

Multi-objective interval planning for 5G base station virtual power

Jul 23, 2024 · Large-scale deployment of 5G base stations has brought severe challenges to the economic operation of the distribution network, furthermore, as a new type of adjustable load, ...

Research on optimal operation of 5G base station

Oct 13, 2025 · HUANG Zhanze. Research on optimal operation of 5G base station uninterruptible power supply in virtual power plant environment [J]. Ningxia electric power, 2025, (1).
