

60kW Folding Container Used at Copenhagen Drilling Site

Overview

What is the new onshore power facility in Copenhagen?

The new onshore power facility in Copenhagen port, co-financed by the EU, is the largest in Europe. The facility will be able to supply electricity to cruise ships docking at Océankaj and Langelinie terminals, and to ferries docking at Søndre Frihavn.

Why is Copenhagen marking the construction start for a new shore power facility?

“The marking of the construction start for the new shore power facility together with the Municipality of Copenhagen and By & Havn is an important milestone in the green transition that benefits the people of Copenhagen.

Is Copenhagen ready for a greener future?

A significant milestone in towards a greener future has been reached in Copenhagen: The construction work on the largest shore power facilities for cruise in Europe commenced in May 2024.

What services do we offer for a carbon storage well?

We offer: Well Trajectory, Casing Design, Torque and Drag, Blowout and Kill Simulation, Tubing Design and Hydraulics Design as stand-alone products. Deep understanding of subsurface geology, logistics, well engineering and drilling supervision is required for proper carbon storage well delivery.
