

# **60kWh photovoltaic containerized solar power unit price reduced**

## Overview

---

What is a 60 kW solar system?

A 60 kW solar system is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits from SunWatts can work for a home or business, with just about everything you need to get the system up and running quickly.

How much does a 60kW Solar System cost?

The lowest cost for a 60kW solar system ranges from \$1.07 to \$1.80 per watt. Buy a 60kW solar kit with the latest, most powerful solar panels, module optimizers, or micro-inverters.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

How much space does a 60kW Solar System need?

A 60kW Solar System requires up to 4,300 square feet of space. 60kW or 60 kilowatts is 60,000 watts of DC direct current power. This could provide approximately 7,000 kilowatt hours (kWh) of alternating current (AC) power per month under ideal conditions, assuming at least 5 sun hours per day with the solar array facing South.
