

AC DC inverter for outdoor use

Overview

Which Inverter should I Choose?

Pure vs. modified sine wave: For sensitive electronics, always choose pure sine wave inverters. Surge capability: Some appliances require more power to start than they do to run. Look for a high surge rating. Extra features: Built-in MPPT solar charge controllers, remote monitoring, and automatic generator start can add serious convenience.

What types of inverters are available?

We offer a variety of specifications and models of inverters to meet your power needs, whether for home, automotive, or travel purposes. The Leaptrend Sirius series 1000W 12V Pure Sine Wave Inverter is perfect for most off-grid systems, whether for a van, RVs, trucks, boats, yachts, coffee van inverter or any remote location needing power.

What size inverter do I Need?

As we demonstrated in our list, there are inverters of all size, from 1.3kW to 12kW. For a small off-grid cabin without AC, we recommend 1kW to 3.5kW. For an off-grid house with a single AC unit, 5kW will do a great job. To power a large off-grid house with all the regular appliances and an AC, you'll need around 10kW of power.

What is the best solar inverter?

We've selected the EasySolar 12/1600, an all-in-one inverter that includes an MPPT solar charge controller and a pure sine wave inverter. All you need to do is plug in your batteries and solar panels. The batteries can be charged by the solar panels or an external AC source (generator, utility grid) as a backup. Max. PV input power: 2000W
