Are rooftop solar systems a good idea for the ASEAN region?

Many countries in the ASEAN region have adopted this rooftop solar system idea and the demand is continually increasing thanks to its potential long-term benefit in reducing the electricity cost (Fig. 6). Moreover, rooftop solar systems become a timely and resource-efficient way for the countries to meet it's renewable energy goals.

What is the installed capacity of floating PV module in ASEAN?

In the ASEAN region total installed capacity of floating PV was below 1 MW till 2019, but large-scale floating PV module installations grew rapidly in Indonesia, Singapore, Thailand, Malaysia, and Philippines from year 2020 and onwards.

Why do governments need to regulate rooftop solar systems in ASEAN?

Regardless to the system, optimizing the use of solar rooftops is a great way to generate clean energy thus achieve renewable energy goals. For those reasons, governments across the region (ASEAN) needs to maintain appropriate policy and regulation to boost the installation of rooftop solar systems. 2.3. Floating PV module.

What does ASEAN stand for?
