How does the UPS system work?

The UPS system automatically selects the power feeding mode to best suit the power situation and load conditions, allowing for seamless mode transitions without output interruptions. The double conversion mode is used under poor power conditions, while economy mode is preferred when conditions are favourable.

How do I choose the right UPS system?

UPS systems support 24/7 operation, preventing any power loss that could compromise security activities. Selecting the right UPS system involves assessing power needs, calculating the total watts required, and determining the necessary runtime to sustain operations during outages.
