

Aluminum roof installation of solar panels

Overview

Can solar panels be mounted on a metal roof?

It's easy to mount solar panels on a metal roof. Metal roofs are durable and can outlive your solar panels. Solar panels can increase the cooling benefits of a metal roof. Metal roofs and solar panels are great choices for climate-conscious homeowners.

How do you install solar panels on a roof?

Before installing solar panels on the roof, apply some sealant to the nut/bolt that connects the solar panel and the metal spacer to secure it during installation. This nut will be facing downward after installation and will be difficult to reach. Apply the sealant before installation.

Can solar panels be installed on an aluminum roof?

Yes, solar panels can be installed on an aluminum roof. Aluminum roofs offer several advantages for solar panel installation, including their exceptional durability and the ability to last for decades with minimal maintenance, making them ideal for holding solar panels.

Can solar be installed on a standing seam metal roof?

Conveniently, installing solar on a standing seam metal roof does not require drilling holes, decreasing the risk of leakage or damage. Multiple manufacturers have developed specific solutions for standing seam roofs where clamps are attached to the vertical ribs of the roof panels' edges.

Aluminum roof installation of solar panels
