## Overview

---

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

How many solar PV projects are there in Jordan?

Jordan Electric Power Company (JEPCO): 591.44 MW (32,257 projects). Irbid Distribution Company (IDECO): 309.32 MW (28,588 projects). Electricity Distribution Company (EDCO): 181.10 MW (13,300 projects). The global decline in solar PV system prices fueled strong demand for installations during the first half of 2024.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

Can PV systems reduce peak demands and energy costs in Jordan?

In Ref. [ 110 ], scholars reported that PV systems could be used to reduce peak demands and energy costs in Jordan. The study shows that installing PV systems can reduce energy costs by up to 10% for large commercial buildings.
