

Are there 60 volt battery cabinets in Belgrade

Overview

What is a Legrand Battery Cabinet?

Universal battery cabinets for all three-phase Legrand UPS from 10kVA up to 800kVA power range. The Battery cabinet is designed to house standard VRLA Batteries of capacity range from 24Ah to 105Ah (C10).

Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

What temperature should a battery be operated at?

The operating temperature must be between +5°C and 40°C, even though the coil characteristics refer to 25°C. In particular, temperatures above 25°C have a negative effect on the life of the batteries, while temperatures below 25°C reduce the efficiency of the batteries.

Can a battery be choked at 50 volts?

Possibility of choking the electrical circuit in blocks at 50 or 75V to limit any accidental contact to that maximum voltage (Standards CEI 21-6 / December 1990). Electrical protection of the battery circuit by means of an automatic switch with command sent to the door.
