

# **BESS maintenance for outdoor communication power supply in the Netherlands**

## Overview

---

What balancing services does the Dutch Bess project use?

Dutch BESS projects mainly participate in two balancing services: Frequency Containment Reserve (FCR) and automatic Frequency Restoration Reserve (aFRR). The Dutch TSO, TenneT, uses these services as the primary and secondary restoration services, respectively, as explained in RaboResearch's report on the Dutch electricity sector.

How can Bess help with the volatility in the Dutch electricity market?

The volatility in the Dutch electricity market presents a landscape of both opportunities and challenges. By integrating advanced energy storage solutions like BESS, you can capitalize on dynamic market conditions while contributing to grid stability.

Why do you need a Bess system?

These systems are crucial for managing fluctuations in energy supply and demand, providing benefits like grid stability and financial potential. By integrating BESS into your energy strategy, you can capitalize on market volatility and price fluctuations, ensuring sustainability and resilience.

What services does Bess offer?

Content overview BESS maintenance with tool-supported wiring and signal test. Communication test and verification of message content. Data logging and remote access to recorded data. Do you want to find out more?
