

Bahrain refinery uses 2MW smart photovoltaic energy storage container

Overview

The Bapco Modernization Programme (BMP) stands as the most significant energy investment in Bahrain's history, aiming to transform the existing Sitra refinery into a world-class facility. How many megawatts will Bahrain produce by 2025?

Bahrain will have to produce 280 megawatts of electricity from renewables by 2025, increasing to 710 megawatts by 2035, to meet the country's renewable energy targets.

What is Bahrain's Vision 2030?

Bahrain's Vision 2030 outlines measures to protect the natural environment, reduce carbon emissions, minimize pollution, and promote sustainable energy. Bahrain is committed to designing energy efficiency policies and promoting renewable energy technologies that support Bahrain's long-term climate action and environmental protection ambitions.

Is Bahrain a milestone in oil refining?

The speakers described the project as a historic milestone in oil refining in Bahrain. Bahrain's oil history dates back to 1930, when initial production was 10,000 barrels per day, gradually increasing over the years.

What will Bahrain's new oil production capacity entail?

During the press conference, the speakers expressed their optimism about the strategic project, which will serve as a foundation for launching new initiatives to enhance Bahrain's position as a leading investment destination. It is expected that production capacity will reach 400,000 barrels per day, representing a 42% increase.
