

# **Base station construction standards for the communications industry**

## Overview

---

What is the mobile phone base station deployment industry code?

The Code replaces the C564:2020 Mobile Phone Base Station Deployment Industry Code. The Code supplements the requirements already imposed on Carriers under the existing legislative scheme by requiring them to consult with local communities on the site selection, design and operation of mobile phone base stations.

What is a mobile phone base station code?

The Code provides a positive consultative framework to improve the community knowledge of mobile phone base stations and deployments. An underlying principle of this Code is that public health and safety is of paramount importance.

What is a BS type 1 Nr base station?

BS type 1-C: NR base station operating at FR1 with requirements set consisting only of conducted requirements defined at individual antenna connectors. BS type 1-H: NR base station operating at FR1 with a requirement set consisting of conducted requirements defined at individual TAB connectors and OTA requirements defined at RIB.

What does the 2025 code mean for mobile phone base stations?

The 2025 revision to the Code aims to improve the means of communication and accessibility of information to local Council and the community relating to the deployment of mobile phone base stations. a precautionary approach to the siting, design and operation of mobile phone base stations.
