

# **Belgian Bureau of Industry and Information Technology solar container communication station wind power**

## Overview

---

What is the capacity of offshore wind energy in Belgium?

Since 2020, a total capacity of 2261 MW of offshore wind energy is operational in the Belgian part of the North Sea. The federal government decided to increase the capacity of offshore wind energy in 2021. The objective is to install an additional production capacity of a minimum of 3.15 and a maximum of 3.5 GW in the Princess Elisabeth Zone (PEZ).

How many wind farms are there in the Belgian North Sea?

There are eight wind farms. The first wind turbines were installed in this area in 2009. All eight wind farms in the Belgian North Sea have been fully operational since December 2020. This means 2022 is the second year with fully installed generation capacity for the Belgian North Sea.

Where are wind farms located in Belgium?

Wind farms are located in the North Sea. In 2004, the government created a 156-km<sup>2</sup> area in the Belgian Exclusive Economic Zone (EEZ) in international waters for wind farms. The first wind turbines were installed in this area in 2009. All eight wind farms in the Belgian North Sea have been fully operational since December 2020.

What percentage of Belgium's Electricity is generated by wind?

Wind power accounted for 19% of Belgium's total installed power generation capacity and 15% of total power generation in 2023.

## Belgian Bureau of Industry and Information Technology solar contain

---

The complementarity of offshore wind and floating ...

Sep 1, 2023 · The complementarity of wind and solar resources can increase common transmission loading, thereby reducing grid costs per kWh. To fully assess the benefits of solar ...

---

Wind power generation

Elia always tries to ensure that its forecasts and the corresponding measurements reflect the latest situation with regard to installed wind power capacity in the Belgian control area. ...

---

Market Development

Dec 5, 2023 · In 2023, the federal government began planning the first Belgian offshore wind farm in the North Sea. In 2004, the government created a 156-km<sup>2</sup> area in the Belgian Exclusive ...
