

Berlin Base Station Power Module Factory

Overview

What is Tesla's Berlin Gigafactory?

The Berlin Gigafactory represents Tesla's most crucial European asset, described by the company as its "most advanced, sustainable and efficient facility yet." The plant recently celebrated producing its 500,000th Model Y, just days after its third anniversary.

What is Gigafactory Berlin-Brandenburg?

Join us at Gigafactory Berlin-Brandenburg to solve the next generation of engineering, manufacturing and operational challenges as we accelerate the world's transition to sustainable energy. Gigafactory Berlin-Brandenburg is the first location in Europe to manufacture cells in-house together with electric vehicles.

Will Tesla expand Gigafactory Berlin-Brandenburg?

Beyond the Model Y, Tesla has ambitious plans to expand Gigafactory Berlin-Brandenburg's capacity to approximately 1m units annually. This expansion aligns with the introduction of Tesla's next-generation model, anticipated to be priced around €25,000 (\$27,250).

What challenges will Tesla's Berlin factory face in 2025?

This latest incident adds to a series of challenges faced by Tesla's Berlin facility in 2025. The factory, which opened in March 2022 as Tesla's first European production site, has been the target of ongoing environmental protests and activist attacks.
