

# Berlin donates solar containers

## Overview

---

What is solarzentrum Berlin?

To start tapping more into the potential of solar energy, both in the private and the public sector, the SolarZentrum (solar centre) Berlin was opened in May 2019. It is a component of the “Masterplan Solarcity”, which works as an independent advisory centre on the topic of solar energy (SolarZentrum Berlin, only in German).

Does Berlin need a solar system?

25 percent of the electricity generated in Berlin can be obtained from photovoltaic systems. To achieve this goal, solar systems with an output of around 4,400 megawatts peak need to be installed on Berlin's roofs: on detached and semi-detached houses, commercial buildings, apartment buildings and public buildings.

How many photovoltaic systems are there in Berlin?

Compared to solar thermal energy, there are far more photovoltaic systems registered in Berlin. As of July 7, 2023, 20,985 systems were in place, with a total installed capacity of around 230 MWp.

Is solar energy a building block for Berlin's climate protection strategy?

The expansion of solar energy use is emphasised as a particularly important building block in Berlin's climate protection strategy, since, with over 560,000 buildings in Berlin, there are rooftops and house façades aplenty, unlike suitable wind power sites.
