

# **Bhutan solar power generation and storage system home complete set**

## Overview

---

What is a solar project in Bhutan?

**Project Goals and Approach to Transformational Change:** The project aims to install 30 MW of solar PV and strengthen the regulatory environment to accelerate Bhutan's renewable energy market, fully realising its solar energy plan of 1000 MW as planned by the government in the current five-year plan (2024-2028).

What is Bhutan Solar Initiative project (BSIP)?

Bhutan Solar Initiative Project (BSIP) aims towards achieving a sustainable energy supply for Bhutan through alternative renewable energy sources of solar grid integration. About 60 De-suups have been actively involved in this six-month long project and have gained practical knowledge of installing solar PV systems through hands-on experience.

What is Bhutan's first solar power project?

The first phase of Bhutan's first utility-scale solar power project at Sephu in Wangdue Phodrang is set for completion by March next year. A utility-scale solar facility generates solar power and feeds it into the grid. The 17.38-megawatt solar farm is expected to generate around 24 million units of energy annually, once operational.

What is Bhutan's RE master plan (2017-2032)?

Bhutan's RE Master Plan (2017-2032) identifies 39,462 MW of potential small hydropower, solar, and wind projects, underscoring the country's commitment to clean energy. The project directly supports the implementation of this Master Plan. **Project Goals and Approach to Transformational Change:**
