

Bogota Communication 5g base station

Overview

What is Colombia's 4G and 5G Action Plan?

The Plan reflects the Petro administration priority of increasing connectivity throughout the country. By 2026, the administration's goal is to provide 85% of Colombia's population with meaningful levels of connectivity. 4G and 5G Auction Development Timeline: December 2022: Publication of 5G Action Plan.

What is a distributed collaborative optimization approach for 5G base stations?

In this paper, a distributed collaborative optimization approach is proposed for power distribution and communication networks with 5G base stations. Firstly, the model of 5G base stations considering communication load demand migration and energy storage dynamic backup is established.

What is a 5G base station?

At the same time, a large number of 5G base stations (BSs) are connected to distribution networks, which usually involve high power consumption and are equipped with backup energy storage, giving it significant demand response potential.

What is a collaborative optimal operation model of 5G base stations?

Afterward, a collaborative optimal operation model of power distribution and communication networks is designed to fully explore the operation flexibility of 5G base stations, and then an improved distributed algorithm based on the ADMM is developed to achieve the collaborative optimization equilibrium.
