Does Brazil have a power grid?

Brazil's small northern and larger southern electrical grids were joined in January 1999 into one grid that serves 98% of the country. Brazil's domestic supply is augmented by imports from neighboring Argentina. Renewable energy likely will continue to play an important role in Brazil's electrification plans.

Will Brazil's energy auction improve power grid reliability?

Interest in the auction has been expressed by power companies such as Portugal's EDP and Brazil's ISA Energia. The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar.
