

# **Can I bring a solar container lithium battery pack to Majuro**

## Overview

---

Can you bring lithium ion batteries on a plane?

There is no restriction on lithium-ion batteries embedded in products such as computers, digital cameras, and mobile phones. However, backup lithium-ion batteries should be brought in carry-on baggage (up to two pieces). Other batteries, such as alkaline batteries, are permitted in carry-on baggage and checked baggage.

What types of batteries can I mail or ship internationally?

There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.

Can You ship lithium hydride batteries internationally?

While not as strictly regulated as lithium batteries, there are still guidelines to follow when shipping dry cell and nickel-metal hydride batteries internationally. The safest way to ship batteries is within the device they power. Ensure terminals are protected (e.g., with tape or caps) and pack the device to prevent accidental activation.

What are the requirements for importing lithium batteries?

Batteries must be installed in or built-in to the equipment. The capacity of the lithium battery or watt-hour rated value, etc. must be within certain limitations. 2 units in case of assembled battery). (4) The mail must be addressed to countries/territories without restrictions on importing lithium batteries.
