

Can solar power generated by solar panels be used directly for home use

Overview

Solar panels can indeed directly power your house, but only during daylight hours and if your energy usage doesn't exceed the power they produce. Can you use solar panels without a battery?

Solar panels generate DC (Direct Current) electricity when exposed to sunlight. The generated DC power can be used directly to power DC appliances or converted to AC (Alternating Current) using an inverter for AC appliances. While using solar panels without a battery has its benefits, it also presents several challenges:.

Should you buy solar panels?
