

Canberra ups uninterruptible power supply battery supply

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a device that offers battery backup in the event the main electrical supply fails or drops. Smaller UPS systems deliver power for a few minutes or so – just enough time to save any important files and shut down the computer properly. Larger systems have enough power to last several hours.

What are industrial-grade uninterrupted power supply systems in Australia?

Industrial-Grade Uninterrupted Power Supply Systems in Australia Power interruptions can be costly. APS Power's Uninterruptible Power Supply (UPS) solutions ensure critical operations remain online, protecting sensitive equipment from outages and fluctuations.

What is a UPS system used for?

An uninterruptible power supply (UPS) is a device that offers battery backup in the event the main electrical supply fails or drops. Smaller UPS systems deliver power for a few minutes or so – just enough time to save any important files and shut down the computer properly.

Why do you need an ups power supply?

It protects critical systems from outages, voltage drops and surges. Our UPS systems ensure your operations continue running without interruption, essential for data centres, hospitals, telecommunications and industrial plants. How many hours will a UPS power supply last?

UPS runtime varies based on system size, load and battery capacity.
