

Charge and storage integrated portable power bank

Overview

What is a portable charger power bank?

The Portable Charger Power Bank 40,800mAh stands as the ultimate charging solution for power users who demand maximum capacity without compromising on convenience. You'll get 6-8 full smartphone charges from its massive 40,800mAh capacity. The unit delivers 25W PD fast charging that'll boost your phone from 20% to 70% in just 30 minutes.

How many devices can a power bank charge?

The icing on the cake is that the power bank recharges continuously under the sun, so you can top up your smartphone and other accessories during emergencies. Along with the built-in cable, the power bank comes with two USB-A output ports and a USB-C output port. As a result, you can charge up to seven devices simultaneously.

How to choose a power bank?

Verify the power bank's capacity matches your devices' requirements. High-demand scenarios like laptop charging need 65W+ PD support, while smartphones typically require 18-30W for peak fast charging performance. Built-in cables eliminate cable management hassles while streamlining your charging setup for maximum portability.

What is the difference between a power bank and a wireless charger?

Fast and Safe Charging: Featuring advanced charging technologies, the power bank delivers up to 20W PD USB-C fast charging, while the 3-in-1 wireless charger provides 15W wireless charging with overcharge and overheating protection.
