

# **Cost of 20-foot Mobile Energy Storage Containers Used at Australian Airports**

## Overview

---

How many battery energy storage systems are there in Australia?

A record 57,000 residential battery energy storage systems, with a combined capacity of 656 MWh, were installed in Australian homes in 2023. About 250,000 Australian homes, totaling 2,770 MWh, now have battery systems.

How many MWh can a container hold?

Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 – 2.9 MWh per container to meet all levels of energy storage demands. Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest cost-of-ownership.

How many Australian homes have battery systems?

About 250,000 Australian homes, totaling 2,770 MWh, now have battery systems. The ratio of battery installations to solar installations was also up in 2023, climbing to 17%, with one energy storage system installed for every six rooftop PV systems.

Are China-based battery energy storage systems becoming more popular?

The last 12-18 months have seen the emergence of more China-based battery energy storage system (BESS) manufacturers and system integrators on the global stage, all selling 20-foot, 5MWh container products (or higher, like CATL's 'zero-degradation' Tener).
