## Overview

---

What is CATL Teneo energy storage?

To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution. It breaks the limitations of power capacity and product transportation, and makes breakthroughs in space utilization, energy efficiency, and cost.

What makes Teneo stack a good energy storage system?

Quiet operation (65dB), making it suitable for cities. With over 1,700 global deployments, CATL continues to push energy storage boundaries. TENER Stack builds on its TENER (zero-degradation) and TENER FLEX (modular rack) systems, offering unprecedented energy density and cost savings.

How many EVs can a Teneo stack charge?

As such, the TENER Stack's stored energy can charge 150 EVs or power the average German home for six years. Per Amanda Xu, CTO ESS & President of ESS Europe CATL: CATL has always been at the forefront of the energy transition.
