

# **Cost of solar panels on rooftops in Greece**

## Overview

---

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How long do solar panels last in Greece?

The payback period for solar panels in Greece typically ranges from 5 to 8 years, depending on factors such as system size, energy consumption patterns, and local electricity rates. After this period, the system continues to generate savings for its 25+ year lifespan. 2. Can off-grid solutions provide reliable power year-round in Greece?

.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.
