

Cote d'Ivoire accelerates the reduction of electricity costs for 5G base stations

Overview

In closing its economic gap with emerging markets, Côte d'Ivoire will face a substantial increase in electricity demand over the next three decades. Côte d'Ivoire has signed the Paris Agreement that aim.

Does Cote d'Ivoire have electricity?

Most of Cote d'Ivoire's primary energy demand is covered by local oil refinery supplies and domestic gas production. Almost 60% of the population had access to electricity in the country in 2017, a 10-percentage point's increase from 2015.

Does Côte d'Ivoire allow private investment in energy production?

Côte d'Ivoire framework has allowed private investment in energy production since the 1980s and as of 2021 three IPPs are active (Azito Energie, Aggreko and Ciprel).

Does Côte d'Ivoire have a commitment to green energy?

According to its National Determined Contribution (NDC) of 2015, the share of green energy in the electricity mix is expected to reach 42% and greenhouse gas (GHG) emissions from this sector are not expected to exceed 9.2 Gt of CO₂ eq in 2030. To date, Côte d'Ivoire has not made any other quantitative commitment beyond 2030.

Will Côte d'Ivoire have an energy mix in 2050?

This scenario aims to mimic an energy mix in 2050 similar to that of today, where gas represents roughly two-third of the total supply. As previously states, natural gas has the advantage of a well-structured and familiar decision-making process and value chain in Côte d'Ivoire.
