

# Customized 10MWh Energy Storage Container for Syria

## Overview

---

What is motoma energy storage system?

The MOTOMA Energy Storage System, containing solar panels, inverte, and LiFePO4 lithium batteries, is designed to seamlessly power daily-use appliances and equipment such as air conditione, refrigerato, lights, fa, and TVs.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
