

Czech small uninterruptible power supply plant

Overview

Could the Czech nuclear industry be involved in projects beyond Central Europe?

Thanks to its know-how, the Czech nuclear industry might get involved in projects beyond Central Europe. In addition to electricity generation, SMRs can be used for co-generation and hydrogen production. "Due to their size and power output, these reactors can be a suitable replacement for coal-fired power plants which are being phased out.

Why is Czech involvement in the supply chain important?

Czech involvement in the supply chain and production of prefabricated units is an opportunity that can result in developing a new economic focus, cultivating nuclear know-how, and a long-term partnership with the manufacturer's country of origin.

How can SMR technology help the Czech nuclear industry?

The technology is quickly gaining traction in Europe and globally. Thanks to its know-how, the Czech nuclear industry might get involved in projects beyond Central Europe. In addition to electricity generation, SMRs can be used for co-generation and hydrogen production.

Which companies are collaborating with Czech companies?

The roadmap also includes information on the various design options, with the ministry's statement noting that among those interested in cooperating with Czech companies were Rolls-Royce SMR and GE Hitachi, whose designs were said to be the "most advanced in the development of a functional SMR".
