

Côte d'Ivoire exports energy storage

Overview

Does Côte d'Ivoire export electricity?

The government is increasingly focused on rural electrification through expansion of the grid and the development of off-grid providers. Côte d'Ivoire regularly exports electricity to its neighbors and is setting its sights on increasing its exports of electricity to its neighbors Burkina Faso, Guinea, Liberia, and Sierra Leone in the coming years.

Will Côte d'Ivoire become a net exporter of crude oil?

Italian energy company ENI leads production at the "Baleine" oil field. By 2027, the site will produce 150,000 barrels of oil per day and 200 million cubic feet of gas daily. These resources will likely turn Côte d'Ivoire into a net exporter of crude oil before 2030.

Why is Côte d'Ivoire a good country to invest in?

Côte d'Ivoire's existing electricity system is the third largest in West Africa. American companies and their reputation for quality products and service would find strong interest in exports such as smart energy-monitoring devices and renewable-energy-related services.

How many MW does the Ivoirian power sector produce?

Electricity capacity stood at 2,548 Megawatts (MW) with 879 MW for hydroelectric plants and 1,669 MW for thermal power stations. The Ivoirian power sector recorded two new production units of 279 MW. The Ivoirian power sector relies on thermal power plants using natural gas as its main fuel source.
