

Danish Communications 5G Base Station Coverage

Overview

Is 5G available in Denmark?

Helped by the highest urbanisation rate, smallest rural population and flattest terrain among the Nordic countries, Denmark's four operators have collectively achieved 5G Availability of at least 70% in each of the country's regions (regioner), despite lower-than-average ARPU, according to Speedtest Intelligence data for Q4 2024.

Which country has the highest 5G availability in Europe?

Denmark retained its position as Europe's leader, achieving an impressive 5G Availability of 83.4%, narrowly surpassing Switzerland, which remains the only other European country to exceed the 80% milestone to date. Spectrum configuration decisions are a critical pillar of mobile network design and play a direct role in shaping coverage outcomes.

Are Nordic operators celebrating 5G availability?

Analysis of Speedtest Intelligence® data confirms that Nordic operators have much to celebrate. In Q4 2024, Nordic countries claimed three of the top five positions in Europe for 5G Availability—the percentage of users with 5G-capable devices spending most of their time connected to 5G networks.

Does Europe have 5G mid-band coverage?

Although Europe is now in line with the global average of 50 percent in 5G mid-band coverage, further deployments are needed to achieve coverage levels comparable to those in North America and India. India has made large-scale mid-band deployments and reached around 95 percent population coverage in 2024.

Danish Communications 5G Base Station Coverage

Europe: 5G base stations by country 2024, Statista

Nov 27, 2025 · As of 2024, Germany had the most 5G base stations among European Union (EU) member states, with over ***** base stations installed.

Optimization of 5G base station coverage based on self ...

Sep 1, 2024 · With the calibrated model, a detailed link budget analysis was performed on the planning area, calculating the maximum coverage radius required for a single base station to ...

5g in denmark

Sep 23, 2025 · Getting access to high-speed 5G in Denmark is straightforward, with extensive coverage provided by the country's three major mobile networks. These networks

The Envy of Europe: Nordics Lead in 5G ...

Jan 20, 2025 · The Nordic countries' success in achieving high levels of 5G Availability underscores the emergence of a two-speed Europe in 5G ...

5G in Denmark

The Danish Agency for Climate Data aims to implement 5G network in the country as effectively as possible. Denmark has the ambition to be among the best in the world to use the 5G ...

Base Station and Population Coverage Omdia

Oct 30, 2025 · Number of base stations deployed and coverage of market population worldwide. Includes summaries and data tables for BTS and NodeB and population coverage.

Kyocera develops AI-powered 5G virtualized base station for ...

Feb 18, 2025 · Kyocera develops AI-powered 5G virtualized base station for the telecommunication infrastructure market Innovative solution for next-generation networks ...

5G network coverage forecast - Ericsson Mobility Report

5 days ago · Global 5G mid-band population coverage is growing at different paces in different regions. Find out more in the latest edition of the Ericsson Mobility Report.

Denmark's 5G Expansion: Transforming Connectivity and ...

Oct 8, 2025 · Denmark in 2025 is accelerating its 5G rollout, reshaping the country's digital infrastructure, industrial landscape, and everyday connectivity. The expansion of fifth ...

The Envy of Europe: Nordics Lead in 5G Availability and ...

Jan 20, 2025 · The Nordic countries' success in achieving high levels of 5G Availability underscores the emergence of a two-speed Europe in 5G deployment.
