

EU Power Tool Lithium Batteries

Overview

What is the new EU Battery regulation?

Understanding the new EU Battery Regulation - we are here to help. The EU Battery Regulatory Explained for Manufacturers and Consumers In July 2023, a new EU battery regulation (Regulation 2023/1542) was approved by the EU. The aim of the regulation is to create a harmonized legislation for the sustainability and safety of batteries.

What is the EU Battery regulation 2023/1542?

In July 2023, a new EU battery regulation (Regulation 2023/1542) was approved by the EU. The aim of the regulation is to create a harmonized legislation for the sustainability and safety of batteries. The regulation started to apply on 18 February 2024. Until 18 August 2025, the regulation will coexist with the Battery Directive (2006/66/EC).

Will cordless power tool manufacturers adopt the same battery format?

So from next year cordless power tool manufacturers will have to start implementing the same battery format in their tools. A short video about this. How can the EU who cannot agree about anything really believe that they can bring all the power tool manufacturers together to adopt a common battery platform.

What types of power tools are exempt from the regulation?

This also includes some types of power tools. Here are some examples: Article 2 of the regulation lists products that are exempted from the Regulation. For example, It does not cover some electrical and electronic products covered by the Low Voltage Directive and the Radio Equipment Directive, such as electric motors.
