

# **Energy company uses 15MWh of Italian photovoltaic containers**

## Overview

---

Why should we build a solar module factory in Catania?

The solar module factory we are building in Catania will be at the forefront in terms of innovative technology and automation of industrial processes and will contribute to the EU's goal of achieving 40 percent energy consumption from renewable sources by 2030, as well as help reduce energy dependence.

How many PV systems are there in Italy?

Since 2010, the number of photovoltaic systems in Italy has recorded a 10-fold increase, reaching almost 1.6 million units in 2023. That year, Lombardy and Veneto were the regions contributing the most to this sector's growth. Together, they accounted for over 30 percent of the PV installed capacity in the country.

Who is EDP Renewables?

EDP Renewables has connected its largest utility-scale solar project in Italy to the grid, furthering the company's efforts to diversify renewable energy sources and speed up the energy transition in all the markets where it operates.

Where is the largest solar farm in northern Italy?

Rome, June 25th, 2024 – An innovative energy transition and redevelopment project has been successfully completed with the full support of the local authorities and community: Trino, in the province of Vercelli, in the Piedmont region, is now home to the largest operating solar farm in northern Italy.
