Why is air cooling a problem in energy storage systems?

Conferences > 2022 4th International Confer. With the energy density increase of energy storage systems (ESSs), air cooling, as a traditional cooling method, limps along due to low efficiency in heat dissipation and inability in maintaining cell temperature consistency. Liquid cooling is coming downstage.

Why does air cooling lag along in energy storage systems?

Abstract: With the energy density increase of energy storage systems (ESSs), air cooling, as a traditional cooling method, limps along due to low efficiency in heat dissipation and inability in maintaining cell temperature consistency. Liquid cooling is coming downstage.
