

# Energy storage project seeking cooperation

## Overview

---

What is the Energy Storage Partnership (ESP)?

The Energy Storage Partnership (ESP) is a collaboration between the World Bank Group and 29 organizations. They work together to help develop energy storage solutions tailored to the needs of developing countries. Energy transitions are underway in many countries with a significant increase in the use of wind and solar power.

What is the energy storage project?

The Gilboa pumped storage power plant is an energy storage project that involves constructing a power plant to pump water from a low-level reservoir to a high-level reservoir, with a height difference of 574 meters. This environmentally friendly plant complements the unique landscape of the North of Israel.

What is the energy storage plan?

The plan outlined 21 key measures, including scaling up energy storage applications in power generation and grid infrastructure, accelerating technological innovation, and improving standardization. It also emphasized talent development and enhancing international cooperation in the sector.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

## Energy storage project seeking cooperation
