

Export of bifacial solar panels

Overview

What is the global bifacial solar market size?

"The quality of research they have done for us has been excellent." The global bifacial solar market size was estimated at USD 16.07 billion in 2023 and is expected to grow at a CAGR of 15.1% from 2024 to 2030.

What is the market outlook for bifacial solar panels & solar modules?

By 2030, the commercial segment is expected to hold the largest share of the global bifacial solar market. In the Commercial sector, Bifacial Solar Panel/Bifacial Solar Module is expected to grow at a CAGR of xx% during the forecast period (2024-2030). Because of increased demand for electricity in the commercial sector during peak hours.

What is the bifacial solar market report?

The report's goal is to provide industry stakeholders with a comprehensive analysis of the Bifacial Solar market. The report analyses complicated data in simple language and presents the past and current state of the industry, as well as forecasted market size and trends.

Will bifacial solar market grow in the commercial sector?

A system using bifacial panels in conjunction with solar trackers produced 27 percent more solar energy than a similarly sized system using traditional panels in the commercial sector. Hence, increased adoption in commercial sector is analyzed to drive the global bifacial solar market in the forecast period 2024-2030.
