

# How many solar energy storage charging stations are there in Georgia

## Overview

---

How many solar farms are in Georgia?

As of December 2025, there were 152 utility-scale solar farms in Georgia. Their total operating capacity is 5,414 megawatts (MW). How many solar farms were built last year in Georgia?

In 2024, there were 8 solar farms built in Georgia. What is the largest solar farm in Georgia?

The largest solar farm in Georgia is Wadley Solar as of December 2025.

What percentage of Georgia's electricity comes from natural gas?

In 2024, natural gas accounted for 41% of Georgia's total electricity net generation and nuclear power provided 34%. Coal accounted for nearly 13% and renewable energy, including solar power, biomass, and hydropower, accounted for about 12%.

Does Georgia have a solar market?

National Solar Capacity Ranking: 7th Data Current Through: Q1 2025  
Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort.

Where is the largest solar PV plant in Georgia?

In fact, the largest operational solar PV plant in the Southeastern United States is located in Twiggs County, Georgia. These days businesses from around the world are committing to using 100% clean energy in their operations. Large corporations in Georgia are going solar as well.
