

How much does a grid-connected solar container cost at an Australian airport

Overview

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

Are off-grid solar systems a viable option in Australia?

As the world continues prioritising sustainability and renewable energy sources, off-grid solar systems, have emerged as an attractive option for homeowners and businesses in Australia. These systems allow consumers to independently generate clean, renewable energy, reducing reliance on traditional fossil fuels and power grid networks.

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025?

According to our Energy Matters team, the average cost of an off-grid solar system for a two—to three-person home is around \$25,000—\$35,000. The greatest expense is the battery.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?
