

How to ground the UPS battery cabinet

Overview

How do you ground an ups cabinet?

Finally, bond UPS cabinets to the nearest interior ground bus, using a green, insulated 2 AWG grounding wire. Installers typically mount the main ground bar (MGB) of a UPS room 24 in. above the finished floor and use zones for best grounding results. Your UPS will do its job only when it has the right infrastructure to support it.

How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

How does a battery cabinet work?

For multiple battery cabinets incorporating battery disconnects, the cabinets are bolted together, forming a single lineup with the UPS. The cabinet grounds are inherently connected to the UPS ground bus via the metal chassis.

Does my ups need a grounding system?

Without a properly installed grounding system, your UPS won't function correctly. A grounding system allows circuit protection to clear a ground fault, and provides paths for diverting surge current away from the UPS and for removing undesirable currents from the critical load. So what can you do to ensure your grounding system allows your UPS

How to ground the UPS battery cabinet

Why can't the battery cabinet be grounded
