

How to unplug the wires of the new energy battery cabinet

Overview

How do I remove a battery from my ups?

If that doesn't work your only choice is to unplug the battery, power down the ups, remove it from the rack, let the UPS sit for a couple of days to drain any charge on the capacitors and then take the top off the UPS and get the batteries out one by one possibly removing some interior screws to loosen the battery compartment walls.

How do you remove a battery from a car?

The first thing to try is unplug the battery string completely and try using a large straight blade screwdriver to pry on the battery casing from the left and right sides - lever the screwdriver against the metal ups chassis casing to the left and right of the battery opening alternately to wiggle it out.

Can a screwdriver crack a battery?

If the screwdriver tip is sharp enough it will bite into the plastic of the battery and get extra grip. Don't worry if you crack the case of the battery it will not cause a problem (re leaks or shorts) as the batteries are toast anyway.
