

# How to use mobile solar energy storage container

## Overview

---

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms, vandalism, and all kinds of possible threats. Mobile solar containers application visuals.

Why do petroleum companies use mobile solar containers?

Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment. Good choice for disaster reliefs whenever it is important to deliver electricity as quickly as possible.

How can I store solar energy?

You can store the converted solar energy in a BATTERY. Follow the connections in the circuit diagram as you assemble your solar system in an OUTDOOR WORKSHOP. Solar Energy is a Green Energy, a Renewable Source of Energy, and it's good for our planet. The energy is stored in the battery and as long as the sun shines, your system will be powered.
