

# **Huawei Power Construction Italy Energy Storage Project**

## Overview

---

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

How much did Italy invest in the first battery storage auction?

Additionally, Enel, the country's dominant energy utility, secured more than half of the auction's capacity across five projects. According to grid operator Terna, total investment from Italy's first battery storage auction is estimated to be around €1 billion. Developer: Portugal-based GreenVolt Location: Southern Italy, Calabria region.

What are the most important energy projects in Sardinia?

The remaining projects vary in size and regional significance: 72 MW BESS in Mogorella, Sardinia - developed by Mogorella Srl, this marks a noteworthy advancement for the island's energy infrastructure, which has long faced challenges due to its geographic isolation.
