

Imported solar panels from Sydney Australia

Overview

Should I buy Australian made solar panels?

If you want Australian made solar panels, I recommend Tindo Solar. They have a track record of quality panel production nearly a decade long. But you'll pay a premium for Australian made. If you're happy to pay extra, this isn't a problem.

Who makes Australia's solar panels?

Source: CSIS With 99 per cent of Australia's solar panels imported, there is only one manufacturer – Tindo Solar, an Adelaide-based company that assembles solar panels using imported silicon cells. The Federal Government is keen to increase the capacity of local manufacturing to capture a bigger market share.

What is the current landscape of solar technology manufacturers in Australia?

Let's dive into the current landscape of solar technology manufacturers in Australia. Australia has a rich solar research and development history, but establishing a solid domestic manufacturing sector has proven difficult. Historically, Australian solar manufacturers have faced stiff competition from overseas producers who offer cheaper panels.

Can I import solar panels into Australia?

This requirement means you should first ensure that any solar system you intend to import into Australia is on the list approved by CEC. The Cheaper Home Batteries Program is an extension of the SRES, supporting households and businesses by providing a discount of approximately 30% on the upfront cost of installing eligible small-scale batteries.
