

Indonesia New Energy Underground Energy Storage Project

Overview

State power utility PT PLN is accelerating Indonesia's clean energy transition through cooperation agreement with the European Union, Germany's KfW Development Bank, and infrastructure development PT Sarana Multi Infrastruktur (SMI) to develop large-scale renewable pumped storage hydropower projects in North Sumatra and East Java. Will Indonesia deploy 100 GW of solar?

The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. The distributed solar for energy self-sufficiency program encompasses 80 GW of solar that will be deployed as 1 MW solar arrays with 4 MWh of accompanying battery energy storage systems (BESS).

Will Indonesia build a battery energy storage system by 2022?

The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022. However, no information has yet been revealed about the Battery Energy Storage System's location or specific functions.

Is energy storage developing in Indonesia?

IESR has issued a report for the first time assessing the development of energy storage in Indonesia in *Powering the Future: An Assessment of Energy Storage Solutions and The Applications for Indonesia*.

Can solar energy be a strategy to meet Indonesia's energy goals?

Solar energy can be a strategy to meet this target," said Deon Arinaldo, Program Manager of Energy System Transformation, at the launch of the Indonesia Solar Energy Outlook 2025 study report - *Breaking the Walls: The Future of Indonesia's Solar Energy and Energy Storage Innovations* (15/10/2024).
