

Industrial uninterruptible power supply in Auckland New Zealand

Overview

What are uninterruptible power supplies (UPS)?

Uninterruptible power supplies (UPS) are devices that provide backup power to electronic devices during power outages, allowing them to continue operating without interruption.

How do uninterruptible power supplies work?

For more information, check out our complete guide to uninterruptible power supplies. An online UPS system supplies power by converting incoming AC power to DC and then reconverts it to a stable AC output through an inverter, all while continuously charging the batteries.

What are Allen-Bradley uninterruptible power supplies (UPS)?

The Allen-Bradley range of Uninterruptible Power Supplies (UPS's) are ideal for use in Industrial processes and are available in both a standard rugged design and a networking model option with remote control and battery expandable features.

What is a backup power supply?

A UPS (Uninterruptible Power Supply) offers short-term power, preventing disruptions and allowing safe shutdowns or transitions to a generator. If you have a solar system, battery storage solutions can store energy for reliable backup power while reducing reliance on the grid. How long will my back-up power supply last?
